June 23, 2014

In the past, our Food Services Department has relied on the business office for the financial status of our program. Starting with the 2012-13 school year, we incorporated a management program created by KH Services called Food Service Management. With FSM, I now have the tools and data needed to have real time and accurate information to manage my program.

The FSM software allows me to manage all operational costs and trends quickly and easily. I am able to view my expenses and revenues multiple ways over a selected time frame and against the previous year. The reports and graphs are flexible, easy to run, read and understand. With this knowledge I am able to respond faster in making adjustments to our program or answering questions from administration. KH Services worked with us to incorporate a way to track our Summer Meal Program, something I did not have previously. They have shown a strong desire to better the management capabilities of our food service department.

FSM and the help of KH Services is a valuable tool in my management of our food service program. Any food service manager looking for a better way to manage their meal program should look at KH Services and their management tools.

Beth Ohman
Food Service Supervisor
